The Spark magazine has had a long pause because of school and other reasons beyond control. It became easy to put off and ultimately quit. However, the reason of its initial publication was still hanging idly and needed to be addressed. The Spark's existence is not a luxury, but a necessity and the team believes that. The Spark Magazine has received numerous support from emaSwati, the more reason it should exist, even for the generations to come. The Spark aims to provide a unique approach that is vibrant and relevant for the youth. We invite you to the launch of the fourth edition, a long wait but one that is worth it!
